

SB ARCHITECTS
(Sandy Babcock)
Architects

Founded in 1960, SB Architects (Sandy Babcock) has forged a longstanding reputation for excellence in the planning and design of large-scale resort, hotel, residential, and mixed-use projects. Now in its fifth decade of practice, the firm is experiencing a renaissance, with a new name and a new generation of leadership, capitalizing upon both the firm's established reputation and exciting new energy.

From its founding office in San Francisco and its 20-year presence in Miami, the firm continues to grow its worldwide practice, providing efficient delivery of services across the country and around the world. A mid-sized firm by design, SB Architects combines the hands-on attention and expertise of a smaller firm with the global understanding, experience, and technological advantages of a large one.

Known for site-sensitive, contextually appropriate design, SB Architects is able to bring to each project a broad understanding developed from a project portfolio that includes scores of differing sites around the world, ranging from urban centers to seaside resorts. Vast international experience with a wide array of project types, geographic locations, construction techniques and architectural styles gives the firm a high level of expertise, combined with flexibility and an individual approach to each project.

More than 180 awards for design excellence attest to SB Architects' continued commitment to sensitive, high-quality design and planning.
